# INTRODUCTION

Our Tourism website, developed with HTML, CSS and JavaScript, replicates the familiar interface of the renowned e-commerce platform. The homepage features a navigable layout with a search bar, showcasing products in visually appealing sliders. Detailed product pages allow users to add items to a responsive shopping cart, and interactive elements enhance the overall experience. User authentication is managed through PHP, ensuring secure account creation and login functionality. The clone is designed to be responsive, and dynamic content loading with PHP supports scalability. The checkout process, simulating multiple steps, incorporates security measures to protect user data.

# LANGUAGES USED

1. HTML

2. CSS

3. JavaScript

**HTML**

**CSS**

**JS**

# HTML

- HTML stands for Hyper Text Markup Language
- HTML is the standard markup language for creating Web pages

# CSS

- CSS stands for Cascading Style Sheets
- CSS describes how HTML elements are to be displayed on screen, paper, or in other media

# JavaScript

Certainly! JavaScript is a crucial technology for web development, and it plays a central role in creating interactive and dynamic web pages
